

## Where To Get Hydraulic Parts, Repairs

If you need hydraulic components for a machine you're building, or if you just need repair parts for an existing machine, here's a company that specializes in everything hydraulic.

Cylinder Services in Rochester, N.Y., runs a booming mail order business and also handles repairs of hydraulic motors, cylinders, pumps, and other components. Their state-of-the-art shop can handle everything from the smallest 1/2-in. dia. cylinders up to huge industrial cylinders measuring 24 in. in dia.

Owned by Don Welch, Scot Anderson, and Marty Lathan, Cylinder Services has been in business since 1974. The three owners get involved in every aspect of the business, maintaining a high level of quality.

They are a stocking Master Distributor of Prince Hydraulics and carry components from many other manufacturers too. Cylinders, pumps, valves, motors - you name it, they carry it, and they'll help you choose the part you need for your application. They also stock hydraulic fittings, gauges, meters, and accessories for hydraulic systems.

Cylinder Services, Inc., says it rebuilds everything from the smallest diameter cylinders to huge industrial cylinders measuring up to 24 in. in diameter. Their state-of-the-art shop can take on almost any hydraulic job.

Cylinder Services' website at [www.CylinderServices.net](http://www.CylinderServices.net) has more information about the company and hundreds of hydraulic components it carries in stock.

Or you can contact them at FARM SHOW Followup, Cylinder Services, Inc., 900 Maple St., Rochester, N.Y. 14611 (ph 585-328-0670).

## Recent South Dakota Coyote Test Proves Successful

Losing calves, sheep, goats and poultry to night predators will end without harming them and you will be using the sun for power. A recent coyote deterrent test stopped coyote kills on sheep ranches in South Dakota.

Nite Guard Solar® a solar powered flash of red light that turns on automatically at dusk and off at full daylight was proven to do this. This unique product is currently being used by farmers and ranchers to protect their livestock.

Animal behavior studies have shown that night predators all share a deep fear of flashing lights as they sense them to be another organism, such as man or another animal, and feel threatened. Raccoons, opossum, fox, skunks, bears, cougars and coyotes will leave your area alone - owls and hawks also are repelled by the Nite Guard Solar as well.

Nite Guard Solar is environmentally friendly, using only the sun or daylight to power them. This product has a range of 1/2 mile or more, is weather protected, small and compact (3"x3"x2") will operate to 30 degrees below zero and is protected against rain, snow and ice.

No more electric fencing, no more need or guard dogs or the nasty time

consuming job of trapping critters that are killing the livestock you worked so hard to raise. A typical arrangement of four lights will cover many acres as the lights are visible from 1/2 mile away to a predator.

Nite Guard Solar is not a strobe type light and will not be annoying to you, your neighbors or your own livestock. There are some "knock off" products entering the market that advertise the same results as this product. Nite Guard Solar is the original product backed by extensive customer service. We are the premium predator control

headquarters.

"When you purchase our product you are also purchasing peace of mind that we will stand behind you offering information, guidance and support to eliminate your predator problem" says Jim Meyer inventor of the Nite Guard Solar® This device is offered to FARM SHOW readers at \$19.95 each.

Go to [www.niteguard.com](http://www.niteguard.com) or call 800 328-6647. Nite Guard, LLC, P.O. Box 274, Princeton, MN 55371.
