Reader Letters

Enclosed is my renewal for 3 years. You will notice that there is an extra \$10. (\$28 total). According to my bank and records, my check to you has never cleared.

Since I enjoyed reading FARM SHOW, I'd like to pay for it. If anyone ever tells you there aren't any honest people in New York, you can say that there are and that you met him.

Louis H. Amsler Northport, N.Y.

Why not farmer owned wind power for heating rural buildings? And electrical generation?

While solar systems all have the characteristics of producing the most heat when heat is least needed, wind power produces the most energy at times when heat demand for buildings is the highest. Wind is always blowing somewhere. A system of farmer owned wind driven generators would be widely scattered and therefore always producing power. Enough of them would not only heat and light all of rural America but could produce surplus electricity to sell to the cities. No tax billions would be required to get a system of farmer-owned, wind-driven generators operating in the U.S.

It is only necessary that farmers be allowed to profit on their investments. This could be now — if the farmers' efforts were not taxed, regulated and harassed by government authoritarian agencies, and if farmers could sell their surplus energy into power grids at fair prices.

Orville E. Stockwell Greybull, Wyo. I am writing FARM SHOW magazine in hopes of finding a solution to the problems my neighbors and I are having with John Deere 210 disks — the model with the 22 in. deep cone blades and a 9 in. spacing. They throw deep ridges up in the fields even though the company men have worked with them. This is not good in an irrigated field.

Wayne E. Reynolds Rt. 1, Box 137 Kearney, Neb.

Thank you for the well written FARM SHOW article on our hydraulic pto drive for pickups. The response has been tremendous! We have received letters from all over the U.S. Your article was a real breakthrough for our business. We thank you very much!

Randy S. Ott Ott Hydraulics Charles City, Iowa

We like your magazine very much. It is very informative. I am writing to take issue with the comments (Best and Worst Buys) by Jerome Schiefen, of Hudson, So. Dakota. We have a (Tasco) dealer — Dan Munson, of Whitten, Iowa — who sells these buildings and have known him for 10 years. In our dealings with him, he has been very fair and honest. He is sold on these buildings and says his customers like them. Maybe on Mr. Schiefen's building they had a bad construction crew.

Mrs. George Chamberlain New Providence, Iowa

Big Red burns No. 2 diesel fuel.

RATED AT 180 GPH AT 750 PSI

Diesel-Fired High Pressure Washer

"So far as we know, it's the first and only diesel fuel powered high pressure washer on the market," says American Kleaner Mfg. of its new Big Rig.

It's rated at 180 gph (with or without cleaning solution), 750 psi pressure and heats water up to 212°F. The Big Rig's burner is designed to burn No. 2 diesel fuel.

In the event of a water supply failure during operation, either from a pressure source (garden hose) or suction source water supply tank, the

unit will automatically shut down and require manual restarting after cause of the water shortage has been corrected.

Overall dimensions are 43 in. long, 22 in. wide and 43 in. high. Weighs 330 lbs. Comes with 50 ft. of 3/8 in. ID high pressure hose and 25° stainless steel spray nozzle.

Suggested retail is \$1.255.

For more details, contact: FARM SHOW Followup, American Kleaner Mfg. Co., Pico Rivera, Calif. 90660 (ph. 213-723-9395).
